- **Speaker at Ecobuild** London for ActiveHouse Alliance (2017)
- **ActiveHouse certifier** (2017)

Dott. IUAV Eileen Meyer Architetto

After attending the University of Art History and Archaeology in Würzburg, she dedicated herself to studying architecture in Venice. Today, Eileen works as a selfemployed architect in Italy and Germany. In addition to her heart's creative business of architecture, she is also an Active House certifier and was co-founder of Active House Italia.

Her background as a certified passive house designer (Darmstadt) and climate house consultant (Bolzano) always moves Eileen to "look for new building solutions that reflect the sustainability of buildings and a social approach in the design of urban living spaces" (AHA Jury '17). Until 2022, she represented the German Aktiv Plus eV on the international Active House Board of Directors (Brussels).

As topics such as art, design and the diversity of cultural backgrounds are among her fundamental tools in planning sustainable and comfortable living spaces, she has found a perfect symbiosis in her activity of accompanying builders on their adventurous path in Italy. This leads from the acquisition of the property to the acceptance on the part of the authorities and the habitability permit.
